

WOOD FINISHES

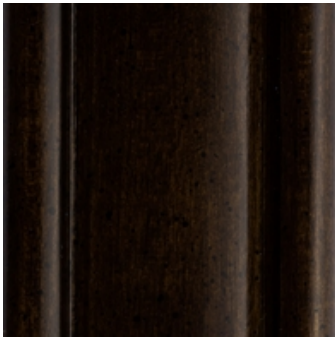

Our craftspeople are among the most respected in the industry. From planing, routing to detailed carving, each process is done by hand following a general pattern -- as with all hand work, the beauty is in slight variations and nuances. We use all Grade A woods which are distinctive and beautifully grained. An inspiration to our craftspeople, they respond to a range of expertly applied stains and finishes. The wood is hand sanded more than seven times before it is stained or applied with a special finish, giving it a smooth touch. *Note: The wood colors and textures shown are representations of the actual finishes. If an exact match is required, a sample must be sent to our factory.*
